PROFILE

I'm an experienced product development professional with a demonstrated history of working in multiple challenging industries. Creating scalable and reliable software products is one of my greatest strengths together with strong technical and design knowledge.

I have worked in every step of the development process throughout my career and gained solid technical and software design skills. I pride myself on having a broad skill set and a thirst for problem-solving while thriving to learn every day.

The people I have worked with know me for analytical and customer-centric thinking, having a people-first approach to teamwork and being a team player with excellent interpersonal skills.
